+ Summary

- Computer science graduate with hands-on Python coding on various successful projects, both collaborating with teams and self-driven.
- Applied passion for creation & problem-solving, such as creating a gaming engine toolkit to optimize an inefficient engine.
- 4 years of customer services experience, communicating on the front line in a high-pace environment.

+ Employment

University of Waterloo

Intern (Part-Time)

May 2016 to Aug. 2016

- Designed a web application tool for data-base professors & PhD students to visualize their data.
- Designed the front-end using HTML, Javascript, SQL, PHP.
- Single-handely developed the program and provided an effective product at the end of my internship.
- Worked together with Supervisor to implement the supplied data

Cineplex

Cast Member (Part-Time)

Courtney Park

Nov. 2016 to Oct. 2016

- Used strong interpersonal skills in order to work with colleagues to provide clientele with high degree of service.
- Predicted & planned the quantity of incoming guests in order to meet demand with appropriate amount of supply.
- Assisted supervisors by delegating daily tasks, while informing the team of policy changes.

+ Projects

Personal Project: Alien Invaders

- Self-taught to learn a different coding architecture for Pygame Library.
- Worked around the challenge of the lacking rudimentary features in Pygame via the creation of classes such as a button class.
- Wrote the code such that the game reads from an asset file in addition to writing to a high score text file.

Personal Project: Messaging Web App

- Designed using self-taught technologies Django, SQLite, JSON and relational databases.
- Constructed an app that allows users to send mail to other users on the platform, providing the ability to archive, marking mail as read, and deletion of the mail.
- Coded both visual and functional aspects of the web app

University Project: Microsoft Paint

- High degree of collaboration was the focus of the project, having four students.
- Created a mimic of Microsoft Paint program, coding for its user tools from scratch.
- Took lead with one other student in order to delegate and organize work amongst the others in order to meet tight deadlines

+ Education

University of Toronto

Sept. 2015 to Aug. 2020
